## ORGANIZATIONAL FRAMEWORK

---

### **New Assets in the Customs' administration**

Major reforms are undertaken in the customs' service in order to face present and future challenges and to fit to the present environment hence the relevancy of the new Decree N°7282 of 30 July 2009.

In a new environment characterized by intensification of trade, new forms of criminalities, the necessity to contribute to the extension of Dakar's port; the reinforcement of the customs' administration at the regional level and the implementation of an optimal management policy of human, financial and technical resources, become important.

### ***Basis of the new organizational framework for a better management:***

- the optimum coordination of actions of the service with the creation of the coordinator as the assistant of the Head officer;
- the establishment of a Direction responsible for Facilitation and Partnership with Companies (DFPE) to promote and reinforce the facilitation of procedures and partnership with companies;
- A better mastering of human, material and financial resources including the management, material maintenance and the rationalization of customs surveillance.

### → **STRUCTURE**

### → **GENERAL DIRECTOR**
